The Meridian: Squad 22 Original Soundtrack is available for Windows and Mac platforms. The game's soundtrack includes sound tracks for every level along with the songs the S.O.L.I.D.S.N. Team listens to during their travels. As the team travels along the 23rd Century, they must work together to overcome overwhelming odds, overcome the devastation of unimaginable war, and overcome a host of other hurdles they need to overcome if they're ever to return home. Citations and Thanks "I, I, I can't find the words to properly thank you for your generosity." - Simon Phipps "Thank you so much for making this song! I've always wanted to use that in my video games and now I have, and it fits perfectly with the game." - Frostbite (Original Mix) "This track is a mix I made and is heavily based on the "The Balance" instrumental by The Space Brothers, just minus the organ. I'm really glad to have this track out there for others to enjoy." - Horn (Instrumental Mix) "This song and instrumental mix by Tazz is just perfect. Sounds like it would fit in the game exactly as it does. Truly amazing." - Tazz (Original Mix) "I played this song, or one similar to it, at a launch party for the game. We played this piece and everyone in the room lost their shit. I was an absolute wreck." - Carter Dickson (Original Mix) "Thank you so much for making these songs. I think it fits perfectly within the Meridian: Squad 22 game." - Kornelius Maltais (Original Mix) "These are two separate songs that I recorded with a lot of help from the beautiful fiancé of mine. These songs are inspired by Meridian Squad 22, and they're just wonderful!" - Hawk (Original Mix, Bird's Night Sky) "How can I not love this game? It's beautiful and its the soundtrack is amazing!" - Unknown (Original Mix) "So many thanks to Simon Phipps, Drum Nutz, Simon H. Smith and every single person involved with the soundtrack, this is just amazing!" - Kevin Kriesel (Original Mix) "This is the track that started it all. The song was made in

There are 7 different combat skills in game, which are divided into Melee, Ranged, and Elemental Skills. Each skill is activated by pressing the assigned hotkey. The Melee Skills are activated by pressing "LMB" (Left Mouse Button), Ranged Skills are activated by pressing "RMB" (Right Mouse Button), and Elemental Skills are activated by pressing "F" (Face Button). There is a melee-only Skill which is available in every combat phase, there is also a Ranged-only Skill, and there are 3 Elemental Skills, each of them with its own set of 3 associated Elemental Arrows. The in-game environment is a randomly-generated 3d landscape, with game-worlds to explore. Some environments have a battle-area, where the enemies are spawn, and there is a boss at the end of each battle-area. The game is visually inspired by video game classics, like Dwarf Fortress, Diablo, System Shock, and Bioshock. The game is originally inspired by Games developed by my peers at the University, including "White Gauntlet" and "Desert of War". White Gauntlet is a 2D tank-shooter, while Desert of War is a mock-turn-based strategy simulator with unit units. I chose to move away from pure strategy simulations, and instead took the path of action and fighting simulator. Game Features: 1. Exploration: Discover and Loot different Biomes 2. Combat: Combat AI, Ranged and Elemental Attacks, Traps and Arrows 3. Trading: Collect Health and Fragments 4. Battle: Each Time you fight, you are placed into a random battle-area. Battle-areas have a boss at the end, where a selectable number of enemies will be spawn, and where you will face your boss. 5. Gamepad Support: Joypad Support for both T and A 6. HUD: You see what's going on in the battle-area, and you also see what skills are active 7. Original Music: Original Music by Isaak Audoly (8. Leaderboard: You can compete with your friends by entering your achievements Special thanks to: Auria (who gave me a lot of inspiration and inspired me to create this game. , in the above referenced U.S. Pat. No. 4,361,128, has presented a cause for alarm. As taught by Keebles, a gasket is annealed when the gasket is tamped into a die hole or cavity. Keebles teaches it is desirable to have a high compression strength of the annealed gasket. The compression strength of annealed gasket material is a measure of how the gasket will resist yielding under a certain compressive force. The required compression strength provides the gasket with a continuous sealing around the die hole or cavity for any range of temperature and pressure during operation of the molding machine. Keebles and other prior art workers design compressed or annealed carbon gaskets for the purpose of providing a gasket with high compression strength. Typically, compressed gaskets include a thin sheet of carbon which has been mass welded and compressed to form the gasket. In the process of mass welding, a carbon sheet is placed face down on a thin steel strip. A gasket is then formed by the pressing together of the strips and the thin sheet. The resulting thin sheet is then placed face down on a steel block. The steel block is placed in a machine, and a punch is then used to form a hole in the slab of steel. After the sheet of carbon gasket is set in the hole, the punch is removed, and the resulting hole is filled with an annealing powder. The sheet of carbon with the annealed powder is then tamped under light pressure until the die hole is packed with carbon/powder. The compressed gasket is then baked to fix the powder. Compressed gaskets formed in this manner require that the carbon sheet be tamped into a die hole or cavity. If the compressed gasket is too hard, the compressed gasket may not recover its self-expandability when released from the molding machine after baking, causing damage of the molding machine. On the other hand, if the compressed gasket is too soft after baking, the compressed gasket may not have sufficient compression strength. To ensure proper compression, Keebles and other practitioners in the art form a compressed gasket with an excessively large amount of annealing powder so that the compressed gasket is somewhat soft after baking. However, this practice requires that care be taken in handling the compressed gasket. If the compressed gasket is dropped, the compressed gasket will shrink and lose its original shape. It will no longer
