Discover how to collect or skip holiday themed levels by playing Holiday Mania. In Holiday Mania you can enjoy a 2D match 3 game with amazing graphics, relaxing music and unique mechanics. All levels are based on some of the big holidays of the calendar year, these holidays include Valentines day, St. Patricks, Easter, Halloween and Christmas. The game play is similar to the original match 3 games, but also has some extra features that make the game really special. If you are looking for a relaxing game that is filled with fun then pick up Holiday Mania and start playing it now! What are you waiting for? - Holiday Mania by FriendsOfLocodol. 8 Reviews for Holiday Mania 5.0/ 5.0 This game is a real gem, the art is extraordinary and the music is beautifully deep. The gameplay itself is fluid and smooth as can be. The use of soft pastel colors is a brilliant and calming addition. However, these colors are not as vibrant as some players might like, but at the same time, you can never have too much pastel, right? The levels are carefully thought out and very well laid out. The puzzles are simple enough to start with, but do not lack thought out puzzles, and some of them are clever and even have a sense of humor. For some, this game may be a bit too easy, but I highly recommend this game to anyone looking for a relaxing and easy 2D match 3 game with beautiful and deep music. Review by Sudipta Sengupta on 12-05-2014 Rating: 4.0/5 Enjoyable I like the concept and easy gameplay. The music was fine enough. I found the puzzles quite challenging at times Definitely worth a download and play. Review by Stephanie Bouchard on 21-11-2014 Rating: 4.0/5 Amazing art The artwork is simply amazing. The characters are lovely and the background is vivid. A little... short I'm pretty sure I beat the game in 3 hours but it might be different for others. Review by James on 03-11-2014 Rating: 4.0/5 Very relaxing and nice This game is relaxing,beautiful,full of easter eggs and Easter stuff. Just play it,enjoy it and relax...Inf

In Overcooked, you and your friends cook in teams of varying sizes and take on a series of demanding kitchen tasks as orders come in from the manager! • You and your friends must prepare, serve and clear hundreds of customers' orders for crazy chefs - trust no one! • Take orders from any of the crazy chefs and you'll be cooking - but watch out for the customers! • Think you're good at cooking? Prove it! Place your best dishes in the restaurant's premium grade chef's hat, then take on the chef hat game to stand a chance at a higher ranking! • Keep an eye on the cooking-time bar to make sure you can keep up with your orders and avoid disaster! • Unlock new chefs, cooking gadgets, and tons more items to turn cooking in Overcooked into your own unique experience. • Only the best will make it through to the final boss! Overcooked Lost Morsel aims to be a bit of a pick-up-and-play game, but heavy on the crazy scenarios that make for awesome laughs. Overcooked Lost Morsel (Overcooked XLM) is the Overcooked version for PC, Mac & Linux. It's a collection of six new campaign levels with all the characters and maps from the base Overcooked game, plus two new chefs to unlock, and a new visual theme called "Jungle", based on a jungle! Way back in 2014, we made the game that would become Overcooked. The idea was to create an endless slapstick arcade cooking game, where the idea was to create the ultimate recipe. It was immediately one of our most popular games and we're super excited to finally get it out there!Overcooked, the game we made, was released in May last year on Xbox One, PlayStation 4 and the PC.We've received great feedback from the players and have made some adjustments to the game that we feel will make the game even better. We're really looking forward to seeing what you think about the changes! The Journey Begins A long time ago... In a not too distant past, we actually had no idea what we wanted to make. At the time, I was getting sick of making games that made a lot of money and fun, but never really meant anything. I've had this idea in my head for a while and I wanted to make a game that actually meant something. One that would have deeper or even cultural c9d1549cdd

What's new:

Doodle God Universe (DDG) is a multiplayer competitive turn-based strategy game that is developed by a Czech team Team Mobivní Team (Computevision). The universe evolves based on the community with the users ultimately determining its evolution. DDG is freely available and is an inspiration for players' creativity in many ways. The game does not have any timers, a specific time limit, or an autobattler. Players can choose a difficulty setting by setting the time limit to a specific length of time. They can test their skills to hone them and advance as far as possible, and the prize is the strongest player, which encourages players to battle and create campaigns. All aspects of the universe are possible within the game, including the ability to use cube maps, a new way of handling different sizes of environments where possible, changing enemy behavior based on their level, and a method for players to move their cubes. The game is intended to last for years. DDG has been ported to the Chinese QQ Mobile network based on the Chinese version of QQ World. **Gameplay** The objects are lists of numbers, "cubes". For each step in time, each object is chosen to follow one of 10 randomly generated paths that it follows. The player or a group of players can then manipulate these cubes according to the rules of the universe. As it is a turn-based, graphical game, it is played in rounds where the player that makes the turn is the protagonist. The competition is focused on strategy, similarly to shogi. The game is also known for its unique art style that resembles the style of Alice in Wonderland. The game is non-linear, but players are encouraged to create campaigns to achieve a particular goal. To create campaign, the player must have the required assets, which the game automatically shares with others with your game profile. A campaign can last for days or weeks. Players can also create custom courses for time events, for example, a quest that has to be completed within a given number of turns. There can also be random, non-repeatable, time events. A time event is a quest that is randomly set for the universe, instead of the player. The player can show up to 50 cubes. The game is available for Windows, Linux, OS X and Android platform and also on QQ mobile game. The game is free and open source and the game server and code repository are available online. Parts

In the distant future, mining is the most dangerous and most important job on the planet. It is mind-bogglingly difficult, but even more dangerous than the huge dangers and huge rewards. The mining operation consists of a multitude of giant metal structures, called Gates, which are the home to the miners, and also the biggest threat to their lives. A new world called Terraria is starting to emerge from the ground of the land, and it is inhabited by a people of dwarves, humans and ogres. Mining in these circumstances is a risky proposition for human miners. What will you do in the mine? Golem Gates is a true puzzle game. It's a mysterious and horrifying game, to be played alone or in co-op. The game's single-player mode is divided in three "Gates", each one containing an assortment of puzzles and enemies which change as the game progresses. Each player character has specific combat, hacking and mining skills. The enemies attack by moving and attacking the surroundings. The players can use the environment to their advantage. Don't get stuck in a corner! Always look around, preferably around the corner. As this is a first-person action puzzle game, players need to focus carefully on their surroundings and get the best timing on solving puzzles to survive. Golem Gates takes place on a futuristic planet, called "Gorelm", which is taken over by mad machines called "gols". In their war against humans and dwarfs, they can't risk having human miners as their greatest threat. They had destroyed the gates and defenses of the human miners, and only few survive. In order to keep the gols at bay and give humanity a chance to rebuild, they called for a new generation of gate miners, who no longer had the power of their forefathers, but instead of destroying themselves with their power, they used their gift to create a new kind of life for the human people. This is the story of three elite and unique Gate miners. You follow them in their struggle. They are called "Sarkar", a set of young wizards, "Vayghesh", a wandering "knight", and "Guvrith", an enigmatic and lethal female warrior. The game takes place in a world of "Terraria", where the ground is slowly emerging from the depths of the planet. Civilization is only just starting to emerge from the old homelands. The moment you start the game, the world
