GPA Calculator is a small java program that allows you to quickly and easily calculate your grades, GPA and retention rate. GPA Calculator allows you to easily calculate your GPA for the four years you have been enrolled, as well as your retention rate. Your GPA is also displayed right on the application, in terms of classes you have completed, classes you have not yet started, number of major subjects taken, average GPA and retention rate. You can also take a look at the list of all your assignments and see how many you have completed and how many remain. With GPA Calculator, it is easier than ever to keep track of the grades you have earned and how many courses you have completed. In order to use GPA Calculator you simply have to enter your name and the numerical grades you got for all your classes. For future reference, you can optionally choose to include your level of the program you are enrolled in as well. After entering all the required data, you will be presented with a printout of your GPA right away, with a value for each of the four years. You can choose to update your GPA at any time, but in order to do so, you can either update all of your grades or simply select the classes you want to update. You can also choose to see how you did in the current year, only if you have completed at least one class. After you have made the desired changes, you can print out a well-organized and thoroughly annotated printout. GPA Calculator also has the ability to calculate your GPA, your retention rate and your GPA for all four years, and to do so you simply have to choose a type of mathematics to be used for the calculation. The calculations can be performed in either decimal system or in fractional system. For future reference, it is also possible to add a note for each class, which you can display or hide according to your needs. Another important feature of GPA Calculator is that it allows you to see which classes you have completed and which ones you have not yet started. In addition, you are able to view the list of all your assignments and see the amount of work you have completed in each of them. Furthermore, you can

mark each assignment as completed or pending. GPA Calculator is a useful, versatile and reliable application for obtaining your grades and keeping track of your grades for all your classes. GPA Calculator allows you to calculate your grades for any academic level. Portable Java tool Has a plotter graphic wizard Has a
